EDUCATION

B.Tech in CSE(Artificial Intelligence and Data Science)

2022 - Present

GMR Institute of Technology, Rajam

AP, India

CGPA: 9.6/10

EXPERIENCE

SDE Intern | House of Companies

July 2025 – Present

- Worked on developing and testing AI agents for automating multi-company management tasks.
- Leveraged the **Relevance AI** platform to design intelligent workflows and conversational agents.
- Contributed to applying LLM-powered solutions for compliance, documentation, and operational efficiency.

AI Intern | TechSaksham – A Joint CSR Initiative by Microsoft and SAP

Jan 2025 – Feb 2025

- Completed an intensive AI internship focused on socially impactful solutions.
- Implemented models including CNNs for image classification and RNNs for sequence prediction.
- Gained hands-on experience with TensorFlow and Keras for model training and evaluation.

PROJECTS

BloodConnect

- Developed a responsive, user-friendly web platform using Django, PostgreSQL, HTML, CSS, and JavaScript.
- Implemented role-based access for users, donors, and admins to manage requests and operations.
- Integrated real-time blood request and a donor-recognition badge system. ([View](#))

Potato Leaf Disease Detection

- Developed and deployed a CNN-based model with a training accuracy of 96% and testing accuracy of 94% using Python, TensorFlow, and Streamlit to detect Late and Early Blight in potato leaves.
- Preprocessed a dataset of 1500 leaf images to improve model performance.
- Designed a Streamlit-based web app for real-time disease detection via image upload. ([View](#))

Recipe Finder

- Created a recipe recommendation platform tailored to user preferences, allergies, and nutrition goals.
- Used the Spoonacular API to provide intelligent filtering by diet, cuisine, and ingredients.
- Built a responsive, clean UI using HTML, CSS, and JavaScript. ([View](#))

SKILLS

Programming Languages

C, Python, JAVA

Frontend Developement & Databases

HTML, CSS, JavaScript, MySQL, Oracle
